

## **Troubleshooting & Repairing Dishwashers & Refrigerators**

Refrigerators and dishwashers are the work horses in homes. They are also the appliances with the most to go wrong. Partsmaster has put together a beginners / intermediate class that is very interactive, hands-on. We will discuss what can go wrong, and troubleshooting when one just doesn't know what is wrong. Replacing parts is easy when you know where to look and how to order, and how to put in the new part. Workbooks are supplied, so the maintenance persons can take it with them.
